

APPENDIX C

AMENDMENTS TO THE ARCHITECTURAL CONTROL GUIDELINES AND PROCEDURES

These guidelines and procedures may be amended. It is anticipated that the changes will involve clarification rather than substantive modification of the existing guidelines and procedures. They may also be amended to reflect changed conditions or technology.

The Architectural Control Committee (ACC) will conduct a periodic evaluation of the guidelines and procedures to determine if amendments are required. Homeowners should also submit to the ACC requests for additions or changes to the guidelines and procedures. The actual amendment proceedings will involve public discussions and review by the ACC and shall be approved as were the original guidelines and procedures by the Board of Directors of the Association.
